

TAGQUEST

Live Transfers

Live Transfers

Live Transfers are probably the most exclusive lead you can buy. When you contract with a TagQuest For Live Transfers the Call Center is calling on behalf of you getting a potential customer interested and qualified before you even talk to them. TagQuest starts by using tailored data to your ideal prospect then the call center goes to work calling the potential clients asking them a number of qualifying questions and recording the information, once they have an interested and pre-qualified prospect they direct connect them to you and then you can take the application and make an offer. Then the call center emails you the prospects information. Meaning the lead is exclusive to just you and they are never resold.
